

## Reynard Corporation Awarded ISO 9001:2015 Certification

Reynard Corporation, Manufacturer of high-performance thin film optical coatings, is pleased to announce that it has been awarded ISO 9001:2015 Quality Management System Certification from The Paragon Group Registrar.

October 3, 2018 – San Clemente, CA – Reynard Corporation, manufacturer of custom precision optical components and thin-film coatings, is proud to announce that it has been awarded the coveted ISO 9001:2015 Quality Management System Certification from the accredited Paragon Group Registrar.

ISO 9001:2015 sets the standards for a quality management system to be in place to provide guidance and tools for a company to ensure their products and services constantly meet the needs of customers. ISO 9001 is granted for meeting or exceeding rigorous international standards in quality management.

“Obtaining our ISO certification is a significant achievement for our company and shows Reynard’s commitment to providing excellent solutions for our customers. Attaining ISO certification is an investment we’ve made to have a system in place to give customers the highest quality service and solutions to meet their expectations”, Randy Reynard, President.

We believe that achieving ISO certification is a confirmation that Reynard Corporation has a strong focus on improving customer satisfaction and that it’s an important capability to support the continued growth of the company. ISO certification assures accountability in all aspects of our business, we look forward to maintaining the highest quality to our customers and we will strive to increase our value to our customers by helping them achieve their business growth objectives.

### About Reynard Corporation
